

# Frontend projects for practice & interviews

[beginners to intermediates]

## Todo List

This is one of the best projects to start while learning, as it covers CRUD operations well. It can be a reference for understanding the flow too

---

## Practice Project

Practice project can be any project of your choice while upgrading your knowledge from beginner level to intermediate

**Examples:**     • Expense tracker     • Calculator     • Quiz App

---

## Game Project

Building a game [simple to complex] will help in learning state, animations, etc. This will help in understading practical challenges

**Examples:**     • Tic-Tac-Toe     • Memory game     • Mine Sweeper

---

## Clone Project

Building a clone of already existing famous web applications gives good understanding of application flow, pixel perfect design, asynchrnous techniques & APIs dealing

**Examples:**     • Instagram     • Netflix     • Amazon

---

## Portfolio

Building a portfolio will help you to both add it to your resume, github, as well as to showcase your skills

**Sample:**     [Devfolio](#)
